

IMDB MOVIE ANALYSIS

Submitted By Harshita Mundhe

PROJECT DESCRIPTION

In this project we have given a dataset of having various columns of different IMDB movies. First we have to framed the problem by asking 'What is the problem?'. By giving answers we can easily defined the problem and can easily find out right data to solve it. After defining the problem we have to use 5 Whys technique to determine the root cause of the problem. IMDB data is widely used to show data in relation to video games, movies, directors, actors, and so on. We can access this data to take look at the information about movies, videos games, actors, and so on.

For analyzing and predicting the best movies, director from the IMDB movie dataset I have used excel as it allow us to ask questions about our data through natural language queries instead of writing complex formulas.

APPROACH

For implementing this project first we have to download the given dataset and open it using Google Sheets or Excel. After that I have cleaned the data by finding null and duplicate values. I used different excel formulas to get the results like min, max, avg and so on. I also used pivot table and pivot chart concepts for getting output. And to present the output in more effectively I used graphs, charts and so on as they help us to quickly analyze data and see relationships.

TECH-STACK USED

- **Microsoft Excel:** I have used Microsoft Excel 2019 MSO (Version 2212 Build 16.0.15928.20196) for getting the meaningful insights from given dataset as it provides high-level visual summaries, trends and it helps us to understand the data through natural language queries that allow us to ask questions about the data without having to write complicated formulas.
- **PowerPoint Presentation:** I have used Microsoft PowerPoint 2019 MSO (Version 2212 Build 16.0.15928.20196) 64-bit to create a report as it allow us to present the complex ideas, facts, or figures into easily digestible visuals.

INSIGHTS

- **Cleaning the data :-**

For defining the problem first we have to clean the data to fetch the exact data. For cleaning the data I removed null values, duplicate values by using various option available in Excel's data tab and used filter option, formatting etc. And then I count the number of rows and columns.

- **Result:**

Row lables	Before Cleaning	After Cleaning
Rows	5044	3740
Columns	28	28

INSIGHTS

- **Movies with highest profit:-**

For fetching movies with highest profit I have created pivot table. Then I have created a column profit which is a difference of Gross and Budget column with the help of calculated item option. And then I filtered first 20 records. I have used pivot chart to represent the results.

- **Result:**

Movie	Profit
Avatar	523505847
Jurassic World	502177271
Titanic	458672302
Star Wars: Episode IV - A New Hope	449935665
E.T. the Extra-Terrestrial	424449459
The Avengers	403279547
The Lion King	377783777
The Jungle Book	375290282
Star Wars: Episode I - The Phantom Menace	359544677
The Dark Knight	348316061
The Hunger Games	329999255
Twilight	308898950
Deadpool	305024263
The Hunger Games: Catching Fire	294645577
Jurassic Park	293784000
Despicable Me 2	292049635
American Sniper	291323553
Finding Nemo	286838870
Shrek 2	286471036
The Lord of the Rings: The Return of the King	283019252
Grand Total	7195009279

INSIGHTS

- IMDB Top 250:-

For fetching top 250 movies I have created pivot table. I have used various filter and sort functions to get the desired output. Then I have created a column rank which is containing rank of movies from 1 to 250.

- Result:

Movie	num_voted_users	imdb_score	Rank
The Shawshank Redemption	1689764	9.3	1
The Godfather	1155770	9.2	2
The Godfather: Part II	790926	9	3
The Dark Knight	1676169	9	4
The Lord of the Rings: The Return of the King	1215718	8.9	5
The Good, the Bad and the Ugly	503509	8.9	6
Schindler's List	865020	8.9	7
Pulp Fiction	1324680	8.9	8
The Lord of the Rings: The Fellowship of the Ring	1238746	8.8	9

INSIGHTS

- **Best Directors:-**

For fetching best directors I have created pivot table. After that I have calculated mean of imdb_score. And sorted the same from largest to smallest. I have used pivot chart to represent the results.

- **Result:**

Director	Mean of imdb_score
Akira Kurosawa	8.7
Charles Chaplin	8.6
Tony Kaye	8.6
Alfred Hitchcock	8.5
Damien Chazelle	8.5
Majid Majidi	8.5
Ron Fricke	8.5
Sergio Leone	8.433333333
Christopher Nolan	8.425
Asghar Farhadi	8.4
Richard Marquand	8.4
Grand Total	8.47

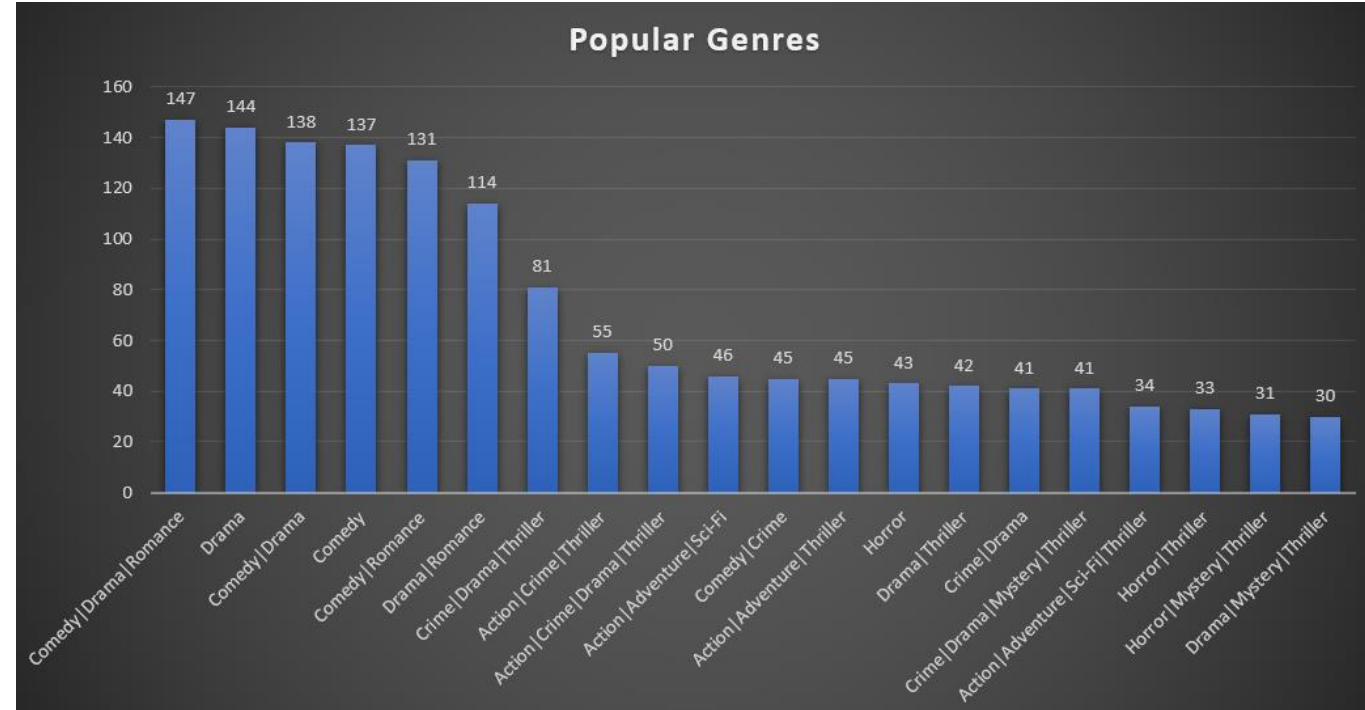

INSIGHTS

- **Popular genres:-**

For fetching popular genres I have created pivot table. After that I took count and sorted from highest to smallest value. I have used pivot chart to represent the results.

- **Result:**

Genres	Count of gross
Comedy Drama Romance	147
Drama	144
Comedy Drama	138
Comedy	137

INSIGHTS

- **Critic-favorite and audience-favorite actor:-**

For this first I created a pivot table and added actor and their movies in rows. After this I grouped them by actor name and calculated mean of num_critic_for_reviews and num_user_for_reviews. And as a result Leonardo DiCaprio has the highest mean

- **Result:**

Actor	mean of num_critic_for_reviews	mean of num_user_for_reviews
⊕ Leonardo DiCaprio	330.1904762	914.4761905
⊕ Brad Pitt	245	742.3529412
⊕ Meryl Streep	181.4545455	297.1818182
Grand Total	267.244898	716.1836735

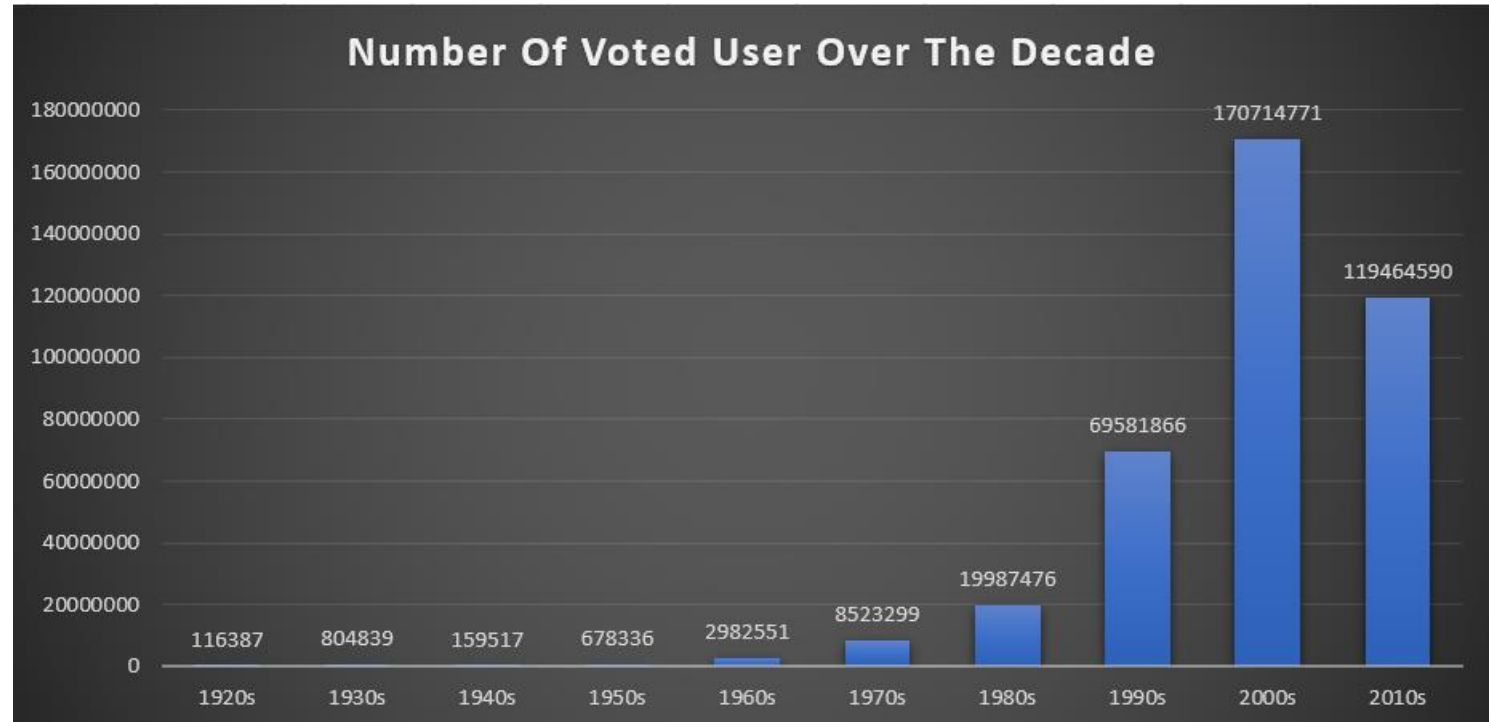

INSIGHTS

- **Number Of Voted User The Decades:-**

For this first I created a pivot table and added year and I grouped them by decades and calculated sum of num_voted_user. And I used pivot chart to represent the data.

- **Result:**

Row Labels	Sum of num_voted_users
1920s	116387
1930s	804839
1940s	159517
1950s	678336
1960s	2982551
1970s	8523299
1980s	19987476
1990s	69581866
2000s	170714771
2010s	119464590
Grand Total	393013632

RESULTS

From these project I understood how to clean the data and extract the exact data which is required to find out the root cause of defined problem. I also understood how to use excel formulas to get the desired output. I got to learn various excel formulas like mean,min, max, avg, count and so on. I got to learn what is pivot table, how to create it and importance of the same. I also got to learn how to represent the data using graphs/charts to make the data / insights quickly and easily understandable.
